### Notes:

-The 'Washington Utility Fuel Mix' is the aggregate fuel mix of all Washington utilities including BPA direct sales to end users in the state of Washington. Each fuel's Total MWh amount is the sum of that fuel's MWh amount from all Washington utilities.

-The sum of all market purchases reported by Washington utilities. Includes that portion of utility claims on BPA power that is comprised of non-specific purchases of electricity by BPA.

-The sum of all Washington utility claims on power generated by specific facilities. Includes that portion of utility claims on BPA power that is comprised of electricity generated by specific facilities.
