The Lead-Hazard Control Grant Program provides funding for the control of lead-based paint hazards in low-income homes and for training in lead safe work practices.

- This $2.48 million competitive award by the Department of Housing and Urban Development runs July 1, 2012, through June 30, 2015.
- The Lead-Hazard Control Grant Program provides resources to local housing agencies to help low-income households with lead-based paint hazards including:
  - Conduct outreach and consumer education.
  - Assess and eliminate or control hazardous lead-based paint conditions.
  - Provide worker training.

Fast Facts

- Lead-based paint is the number one environmental hazard to children under age six.
- Lead-based paint hazards are found in housing built before 1978.
- Lead poisoning in children can lead to permanent learning disabilities.
- Lead-based paint control services will be provided by specially trained individuals using lead-safe work practices or approved abatement methods.
