NOTES: "Homeless or Unstably Housed" refers to all homeless and all unstably housed, including couch surfing. "Homeless Only" is a subset of "homeless or unstably housed" and refers only to unsheltered clients or those living in emergency shelter. "New" homelessness refers to clients who are homeless in the current month but not in the month previous, while "continuing" refers to all homeless clients. There might be larger numbers for "homeless only" columns because a transition from "unstably housed or homeless" to "homeless only" is counted as "new" homelessness. Columns cannot be added across rows because the continuing and "Homeless or Unstably Housed" categories include new and "Homeless Only" categories, respectively. Household classification is derived from the HUD categories of "Households without children," "Households with at least one adult and one child," and "Households with only children." HUD classified households do not necessarily correspond to Basic Food assistance units (AUs). The housing data fields used in this report are updated at initial application, with a change in circumstance, and semi-annually at the mid-year review, for as long as the client's Assistance Unit is receiving basic food benefits.

NOTES: Data was extracted from Provider One (P1), the Integrated Client Database (ICDB), and the Automated Client Eligibility System (ACES). Disability categorization is based on P1 medical eligibility records for the 24 month period previous to the current experience of homelessness. HUD defines chronic homelessness as an individual with a disabling condition who has been homeless and living or residing in a place not meant for human habitation, a safe haven, or in an emergency shelter continuously for a) at least 1 year or b) on at least four separate occasions in the last 3 years, where the cumulative total of the four occasions is at least one year. Mental health treatment need is identified by the presence of diagnoses, psychotropic medications and/or mental health services. Substance use disorder treatment need is identified by diagnoses, procedures, prescriptions, treatment and/or arrests that reflect a possible substance use disorder. Rows cannot be added because of overlapping clients within each categorization.

NOTES: "Homeless or Unstably Housed" refers to all homeless and all unstably housed, including couch surfing. "Homeless Only" is a subset of "homeless or unstably housed" and refers only to unsheltered clients or those living in emergency shelter. "New" homelessness refers to clients who are homeless in the current month but not in the month previous, while "continuing" refers to all homeless clients.
