Statutory Authority:

The Revised Code of Washington (RCW) Chapter 39.44 was amended in 1990 as follows:

“Each local government that issues any type of bond shall make a report annually to (the Department of Commerce) that includes a summary of all the outstanding bonds of the local government as of the first day of January in that year. Such report shall distinguish the outstanding bond issues on the basis of the type of bond, as defined in RCW 39.44.200, and shall report the local government’s outstanding indebtedness compared to any applicable limitations on indebtedness, including RCW 35.42.200, 39.30.010, and 39.36.020.”

Important Note: We make all efforts to ensure the accuracy of the data, but it has not been audited and should be read with caution. Commerce assumes no liability for any inaccuracies. We cannot guarantee full compliance with state reporting requirements, so debt issue listings may not be exhaustive. If data from a jurisdiction is not listed, no assumptions should be made about its debt status. Reported issue costs may not be final figures.

To inquire about the availability of this publication in an alternate format, please call 1-800-833-6384 or TDD/TTY 1-800-833-6388.

SURVEY FINDINGS

Recession has Impacted Debt in Varying Ways

Local government debt levels increased by an average of 30 percent while total assessed valuation declined slightly between 2007 and 2010.

However, increases in use of debt capacity appear to be more related to the taking on of additional debt rather than decreases in assessed valuations.

Despite these statewide patterns, there was sometimes substantial variation among jurisdiction types and parts of the state. For example, total assessed valuation of counties declined by 2.6 percent, whereas they rose 3.8 percent for cities between 2007 and 2010.

Purpose of This Report

The GO Report assists policymakers in assessing the fiscal health of local governments by

presenting data about the amount of allowable debt jurisdictions use. This has been of heightened interest in the wake of the 2007-2009 recession.

The primary function of this report has been to present raw data in an easily digestible form. However, some data analysis is provided for the larger jurisdiction types.

Local Debt Limitation Primer

Under the state constitution and statutes, local governments are limited in the amount of general obligation debt they may acquire. Statute defines each jurisdiction type's debt limitation as a percentage of the assessed valuation of the taxable properties within the jurisdiction. The statutory percentage differs for each jurisdiction type.

In addition to an overall debt limitation, most jurisdictions have specific, lower limitations on debt that has not been voter approved. Debt limitations are listed in TABLE 1 for the jurisdiction types addressed in this report. Some jurisdiction types have statutory exceptions to the debt limitations. For example, small ports – less than \$800 million in assessed valuation – may exceed their debt limitations for some types of capital improvements, provided the Dept. of Commerce approves their financial and development plans.

Valuation and Debt Capacity

When analyzing the 2009-2010 data, a key research question was whether declining valuations caused by the recession impacted the percentage of debt capacity being used by our local governments.

For example, if a jurisdiction was already using a large percentage of their allowable debt in 2007 (prior to Washington feeling the impacts of the recession), would declining property valuations push that jurisdiction over their legal debt limitation without the jurisdiction acquiring additional debt?

The answer: generally no, but possibly yes in a handful of cases. Increases in local government use of debt capacity appear to be more related to increases in actual debt amounts than to decreases in assessed valuations.

Major Variance in Valuation Patterns

Between 2007 and 2010, the total assessed valuation of all counties together declined by an average of 2.6 percent from \$846 billion to \$825 billion. However, not all county's valuations declined. High-valuation counties declined in assessed valuation by an average of 6 percent, but medium-valuation counties increased by 20 percent, and low-valuation counties increased by 8 percent.

For cities, assessed valuations increased 3.8 percent statewide between 2007 and 2010. Similar to the pattern in counties, medium-valuation cities experienced a more significant increase in valuation – 6.7 percent – than did either higher- or lower-valuation cities. High-valuation cities increased in

TABLE 1: Debt Limitations			
Jurisdiction Type	Limit on Non-Voted GO Debt	Limit on Voted GO Debt	Limit on Total GO Debt
Cities/towns	1.5%	7.5%	7.5%
Counties	1.5%	2.5%	2.5%
School districts	0.375%	5.0%	5.0%
Port districts	2.5%	7.5%	7.5%
Hospital districts	0.75%	2.5%	2.5%
Library districts	0.1%	5.0%	5.0%

SURVEY FINDINGS

assessed valuation by 3.8 percent, and low-valuation cities by 0.3 percent.

Even among valuation clusters, changes in assessed valuation have not proven to be consistent. For example, in the high-valuation cluster, Spokane County increased in assessed valuation by 6 percent while all other high-valuation counties declined. Among medium-valuation counties, Island and Clallam decreased in valuation, while Grant increased by 61 percent.

Among low-valuation, rural counties, all increased in valuation, some by much wider than average margins: Klickitat by 61 percent, Columbia by 41 percent and Okanogan by 35 percent.

The variations within valuation clusters also hold true for cities. For example, in the high-valuation cluster, Bellevue, Spokane, Redmond and Everett all increased in value, while Seattle, Tacoma, Vancouver and Kent decreased. Among medium-valuation cities, only Mukilteo registered a decrease in assessed valuation, while several cities registered significant increases, including Renton at 18.7 percent and Bellingham at 19 percent.

East Fared Better in Valuation

Eastern cities and counties fared better in assessed valuation than their western counterparts between 2007 and 2010. Among high-and medium-valuation cities, those on the west side of the state declined in valuation by an average 1.9 percent, while eastern cities increased by 18.2 percent. Among counties, those in the west declined by an average 5.6 percent whereas eastern counties

Among high- and medium-valuation cities, those on the west side of the state declined in valuation by an average 1.9 percent, while east side cities rose by 18.2 percent.

increased in assessed valuation by 19.1 percent.

However, changes in assessed valuation do not necessarily indicate corresponding changes in market value. Many assessors have recently ramped up reassessment schedules in order to ensure the accuracy of property tax collections. In addition, assessors have worked to better align valuations – which have traditionally lagged behind market values – with actual market values of properties.

Statewide Debt Rose 30 Percent

Because assessed valuation is affected by so many diverse market and policy factors, measuring per-capita debt may be more useful than percent of debt capacity as a way of looking at trends in local government debt during volatile economic times. Between 2007 and 2010, county per-capita debt went up 25 percent and city per capita debt increased 18 percent.

Nevertheless, statewide total debt by reporting jurisdictions went up approximately 30 percent between 2007 and 2010. Total county debt went up by 29 percent, although the range among counties

varied widely. Asotin, whose total debt went down 96 percent since 2007, contrasted with Mason, whose debt increased more than 4,000 percent. This translated into Mason using 18 percent of its total debt capacity, which was the fourth highest of the counties in 2010.

The top three counties in debt capacity were Cowlitz (increasing from 11 percent of capacity in 2007 to 48 percent in 2010), King (23 to 29 percent) and Whitman (dropping from 34 to 27 percent). Note that King County owes 63 percent of all county debt but has 29 percent of the state's population.

Total debt by responding cities went up by 31 percent; the variation was even greater than for counties. For example, University Place's total debt increased from \$19 million in 2007 to \$52 million in 2010; the city maxed out its non-voted debt capacity and used 21 percent of its total debt capacity – the highest of reporting cities.

The rest of the top four reporting cities were Gig Harbor (increasing from 15 percent of capacity in 2007 to 20 percent in 2010), Spokane (12 to 18 percent) and Olympia (1 to 18 percent).

Among school districts that reported in both 2007 and 2010, 30 percent had increased debt and 70 percent saw decreased or no change in debt. Eighteen of the top 20 school districts in percent of debt capacity used were in the low-valuation cluster. In addition, the top three saw their use of total debt capacity rise substantially: Davenport (from 36 percent in 2007 to 86 percent in 2010),

SURVEY FINDINGS

Deer Park (29 to 79 percent) and Camas (35 to 77 percent).

Small Districts Used More Voted Debt

For all jurisdiction types, allowable non-voted debt is more limited than voted debt. Cities, for example, are limited to non-voted debt of 1.5 percent of valuation, compared with 7.5 percent for voted debt. This limitation impacts smaller cities and counties more than those with high and medium valuations. Low-valuation jurisdictions are more likely to need to seek voter approval prior to issuing debt for large projects in order to cover total project costs.

For 2010, low-valuation counties used only an average of 1 percent of county non-voted debt statewide, but 7 percent of voted debt. Similarly, low-valuation cities used 11 percent of city non-voted debt, and 19 percent of voted debt.

Reading the Data Graphics

General comparisons tables are a quick picture of debt for the three jurisdiction types that represent the majority of total local government debt (counties on page 7, cities on page 13 and school districts on page 32). These tables divide the jurisdictions into high-, medium- and low-valuation clusters. Organizing the data by valuation clusters helps clarify debt trends, since there are marked differences from one cluster to another in per-capita debt and share of assessed valuation and population. Because school district population data was not available, those tables differ from those for

cities and counties, instead showing comparisons in the use of voted and non-voted debt.

Non-voted, voted and total outstanding GO debt tables and pie charts list the top jurisdictions by percentage of debt capacity used, rather than by assessed valuation (counties on page 8, cities on page 14, and school districts on page 33). The pie charts show the differences among valuation clusters as to whether or not jurisdictions sought voter approval prior to issuing debt. School districts use a much higher ratio of voted to non-voted debt because their ability to issue non-voted debt is much more limited in statute than other jurisdictions.

Trend tables present a five-year picture of changes in debt – both the total amount of debt and the percent of debt capacity used by each jurisdiction. In addition to listing the five-year data, the trend tables also calculate changes in the dollar amount of each jurisdiction's debt and in assessed valuation over a five-year period. Trend tables are on page 9 for counties, pages 15-21 for cities and pages 34-41 for school districts.

Trend graphs are presented for selected individual jurisdictions based on the completeness of the five-year data and how representative the jurisdiction was of its valuation cluster. Top trend charts show the ratio of voted and non-voted debt in actual dollars. Bottom trend charts illustrate use of debt capacity by percent for non-voted, voted and total debt. The trend charts are particularly useful for highlighting notable changes in debt patterns for the individual districts.

READING THE DATA

■ In the tables \$0 means no GO debt was reported in a given category. A blank space indicates a survey was not submitted, was incorrect and unusable, or no assessed valuation data was available with which to calculate debt capacity.

■ The cluster analysis shown in the *General Comparisons* tables (pages 4, 13 and 32) ranks jurisdictions by assessed valuation because it was deemed more useful in analyzing debt than the more typical approach, which is to group by population.

■ Assessed valuation data is from the state Department of Revenue; population data is from the Office of Financial Management.

■ For space reasons, “AV” refers to a jurisdiction's assessed valuation, and the term “cities” has often been used generically to refer to both cities and towns.

■ The *GO Debt Capacity Detail* tables are broken out by jurisdiction type. Note that the content of some columns varies by jurisdiction type because of differing categories of debt. The calculations used to determine GO debt total figures and statutory capacity percentages are listed near the top of each table page. Negative subtotals – which represent positive cash flow – were converted to \$0, since this report only measures debt. Italicized columns represent figures subtracted from debt subtotal columns.

■ Some tables refer to the “% of Cap.” This means the percentage of a jurisdiction's statutory GO debt capacity being used. These limits may be higher than what is needed to maintain a good credit rating, according to *A Debt Primer for Washington's Cities and Towns*. This useful report was published in 1994 (No. 30) by the Municipal Research & Services Center of Washington (<http://www.mrsc.org/>).

NOTES & CAVEATS

What Data Is Collected

Each year the Dept. of Commerce collects local government general obligation (GO) debt data by surveying approximately 800 cities, towns and counties, plus school, library, hospital and port districts.

The data gives a snapshot of the jurisdictions' debt at the end of the previous year. *The GO Report* analyses and presents that data.

Data are collected in the following categories:

- GO debt issuances that were not voter-approved
- Long-term debt that was not voter approved, including categories such as lease-purchase contracts and uncompensated absences for jurisdiction employees
- GO debt issuances that were voter-approved
- Debt service funds restricted to paying off each of the above
- Revenue debt and government loans
- Special-assessment debt
- Credit ratings

How the Survey is Conducted

The 2010 GO debt survey was sent to 775 jurisdictions in October 2011. The survey requested debt data as of August 31, 2010, for school districts and as of December 31, 2010, for all other jurisdiction types.

In previous years, the Bond Users

Clearinghouse sent a packet of survey documents to each jurisdiction and collected responses online and by mail, email and fax. However, as a cost-savings measure, in 2009 the survey was only sent out by email, and in 2010 the Clearinghouse sent a postcard notice with a link to the online survey tool and collected all survey data electronically. We followed up with email reminders and telephone calls.

A total of 591 jurisdictions (76 percent) submitted surveys for 2010, and 467 (60 percent) in 2009 (see TABLE 2). The response rate declined from an average 91 percent over the previous five years. Factors that have negatively impacted the response rate include staffing cuts at the local level. In addition, staffing vacancies at the Clearinghouse have resulted in gaps in the program's ability to follow up with non-responders. It also may be that the postcard plus email methodology was not as effective as the full survey packets used in the past.

Note that 2009 data was not widely disseminated so is included as an appendix.

Experienced Hands Assist Program

The Dept. of Commerce brought back two former Clearinghouse program managers to produce the 2010 edition of *The GO Report*: Liz Green-Taylor and Steve Salmi, who now work in the agency's Research Services unit. They were joined by Cezanne Murphy-Levesque, who played a major role in the data collection, analysis, and report design and production.

TABLE 2: 2010 Survey Response Rate

Jurisdiction Type	Number Surveyed	No. of Responses	Response Rate (%)
Cities/Towns	281	221	79%
Counties	39	39	100%
School Dist.	296	224	76%
Port Dist.	74	52	70%
Hospital Dist.	54	36	67%
Library Dist.	31	19	61%
Totals:	775	591	76%

Commerce Research Services operates the Local Government Fiscal Note Program and has produced reports, including the 2010 study, [Washington State Local Government Financial Health Indicators](#) for the State Treasurer's Office.

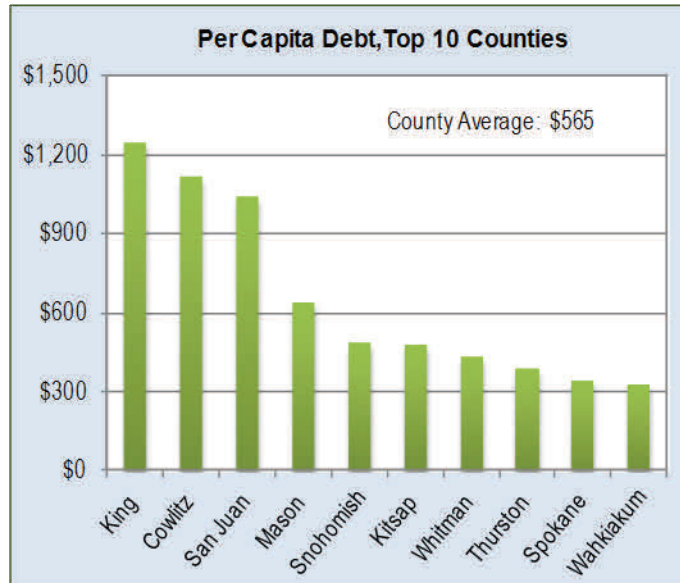

Next Step: One-Stop Reporting

Technology changes are finally putting within reach a long-time Clearinghouse goal – to coordinate our data collection with that of the State Auditor's Office. We are working to link our systems so that local governments will only need to report one time per year to fulfill statutory reporting requirements to both agencies.

Our hope is that the 2011 survey that is sent out later this spring will be the last one done separately from that of the Auditor's Office.

COUNTIES, 2010

* Group average rather than total

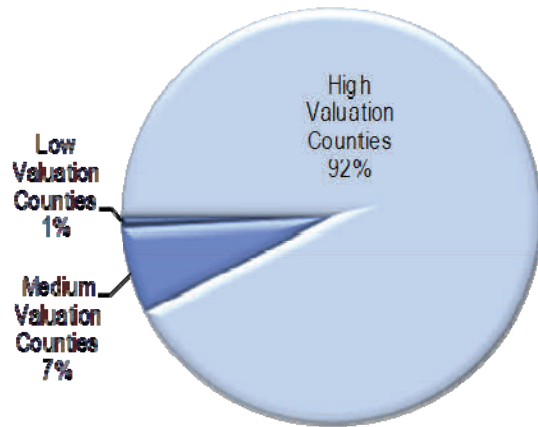

GENERAL COMPARISONS — Ranked by assessed valuation and clustered in three groups

County Name / Valuation Cluster	Total GO Debt	% Cap.	Population	Assessed Valuation (AV)	Debt / Pop.	Debt / AV	Debt % of Total	Pop. % Total	AV % Total
King County	\$2,413,960,492	29%	1,933,400	\$328,631,000,000	\$1,249	0.73%	63.46%	28.71%	39.83%

5 WAYS TO LEARN MORE ABOUT **PUBLIC DEBT** IN WASHINGTON STATE

Visit our website at www.commerce.wa.gov/buc and click on “Bond User Documents” to access these resources:

■ **PUBLIC DEBT UPDATE**

This quarterly newsletter provides information on bonds and other types of debt issued by local and state government. Available on our website or by e-mail distribution list.

■ **MONTHLY SPREADSHEET OF DEBT ISSUE DATA**

Spreadsheets are available as an Excel 2007 file from our website or by e-mail distribution list.

■ **ARCHIVES OF DEBT ISSUE INFORMATION**

“Bond 101” disclosure reports and recent official statements are downloadable through the “Search the Bond 101 Database” link on our website or by contacting buc@commerce.wa.gov for customized searches. Search for particular bond issuances, then click on “Official Statement” or “Covenants” to download recent documents or an electronic form to request copies of older documents.

■ **THE PUBLIC DEBT REPORT: AN ANALYSIS OF BOND AND OTHER DEBT ISSUES BY LOCAL AND STATE GOVERNMENT**

Our annual wrap-up of debt-issue activity by local and state government is available electronically on our website or by e-mail distribution list.

■ **THE GO REPORT: AN ANALYSIS OF OUTSTANDING GENERAL OBLIGATION MUNICIPAL DEBT**

The results of our annual survey of local government debt capacity are available annually on our website or by e-mail distribution list..

ALL OF THESE SERVICES ARE FREE. CLICK [HERE](#) TO SUBSCRIBE TO OUR EMAIL DISTRIBUTION LISTS TODAY.
