#### MUNICIPAL BONDS IN WASHINGTON STATE

JANUARY 2003 Vol. 11, No. 1

Municipal Bonds in Washington State is a monthly publication of the Bond Users Clearinghouse at the Washington State Department of Community, Trade and Economic Development (CTED), 906 Columbia Street SW, PO Box 48350, Olympia Washington 98504-8350.

The mission of the Bond Users Clearinghouse is to provide up-to-date information about debt issuances within the state of Washington. The *Municipal Bonds* newsletter began publishing monthly in 1992, and is available at no charge in either a print or e-mail edition. The data is also available in Microsoft Access and Excel formats.

Municipal Bonds summarizes debt issuance information submitted to CTED on Bond Report Form 101. The reporting of bond issues is voluntary, and so the listings are not exhaustive.

For more information, contact *Municipal Bonds* editor Steve Salmi at 360/725-3021 or <a href="mailto:steves@cted.wa.gov">steves@cted.wa.gov</a>.

#### Introduction

This issue of *Municipal Bonds* includes the 2002 annual report as well as January's debt issuances. Regular readers will notice format changes for both sections. Our main goal was to make the data easier to understand.

In this year's annual report:

- Numerical tables are augmented with charts that more graphically illustrate the data;
- more data from previous years is included so you can see longer-term trends; and
- the prime interest rate is listed as a general point of comparison (see page 3).

A few research caveats: The dollar figures used in previous years are not adjusted for inflation. Prime interest rate data is from the Federal Reserve System. And as usual, remember that the reporting of issuances is voluntary, so the data are not exhaustive.

Regarding January's listings, please take a moment to familiarize yourself with the new ways the data is arranged.

#### **Table of Contents**

Public Debt Issues, 1987-2002 / Page 3

Local and State Debt, 2002 / Page 4

Long- and Short-Term Debt / Page 5

New and Refunding Issuances / Page 6

Types of Bond Sales / Page 7

Type of Debt Instruments / Page 8

Types of Local Issuers / Page 9

Issue Purpose / Page 10

Thirty Largest Issues for 2002 / Page 11

We hope that the format changes to the annual report and the monthly listings spur you to consider: What data is most -- and least -- relevant to your needs? How might the data be made easier for you to access? Any ideas are appreciated. Send me a quick e-mail.

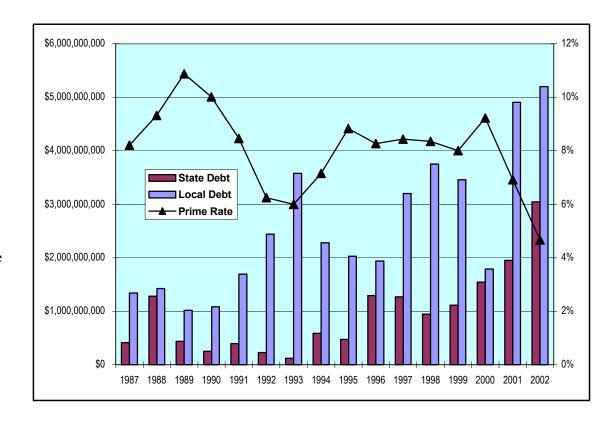

-- Steve Salmi, Municipal Bonds editor

### Public Debt Issues, 1987-2002

The volume of public debt issuances once again broke all records in 2002 as interest rates continued to decline. Total volume increased 20 percent to \$8.25 billion. This is more than double from only two years ago, when volume hit a four-year low at \$3.3 billion.

Most of the volume growth in 2002 came from state issuances, which jumped 56 percent to \$3 billion. This is triple state volume in 1998.

Although growth in local debt issuances leveled off in 2002 to \$5.2 billion, this was still more than double the volume in 2000.

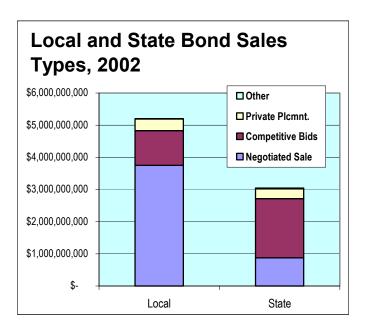

|      | State Debt      | Local Debt      | Total Volume    | Prime Rate |
|------|-----------------|-----------------|-----------------|------------|
| 1987 | \$412,495,000   | \$1,340,550,849 | \$1,753,045,849 | 8.21%      |
| 1988 | \$1,282,094,386 | \$1,426,497,347 | \$2,603,696,733 | 9.32%      |
| 1989 | \$434,450,000   | \$1,016,531,156 | \$1,450,981,156 | 10.87%     |
| 1990 | \$250,299,188   | \$1,085,724,736 | \$1,336,023,924 | 10.01%     |
| 1991 | \$395,051,914   | \$1,693,622,946 | \$2,088,674,860 | 8.46%      |
| 1992 | \$226,924,696   | \$2,442,314,071 | \$2,669,238,767 | 6.25%      |
| 1993 | \$121,158,706   | \$3,574,913,229 | \$3,696,071,935 | 6.00%      |
| 1994 | \$585,186,814   | \$2,280,361,589 | \$2,865,548,403 | 7.15%      |

|      | State Debt      | Local Debt      | Total Volume    | Prime Rate |
|------|-----------------|-----------------|-----------------|------------|
| 1995 | \$473,426,516   | \$2,027,830,626 | \$2,501,257,142 | 8.83%      |
| 1996 | \$1,294,514,296 | \$1,936,712,261 | \$3,231,226,557 | 8.27%      |

| 1998 | \$947,216,160   | \$3,752,143,345 | \$4,699,359,504 | 8.35%      |
| 1999 | \$1,112,192,849 | \$3,455,776,669 | \$4,567,969,518 | 8.00%      |
| 2000 | \$1,544,288,819 | \$1,787,536,894 | \$3,331,825,713 | 9.23%      |
| 2001 | \$1,950,344,750 | \$4,903,219,358 | \$6,853,564,108 | 6.91%      |
| 2002 | \$3,046,794,660 | \$5,198,232,311 | \$8,245,026,971 | 4.67%      |

#### **Local and State Debt, 2002**

Local and state governments displayed a number of similarities in their debt-issuance strategies. For example, new issues represented 58 percent of total volume at both the state and local levels. In addition, both relied most heavily on bonds, although local jurisdictions were more inclined to issue notes than the state.

Local jurisdictions diverged most sharply from state government regarding types of bond sales. The state used competitive bids for 60 percent of its issue volume, but local governments preferred negotiated sales to the tune of 72 percent.

### Long- and Short-Term Debt, 1997-2002

Bonds continue to be the primary method of securing debt, with 351 issues totaling almost \$7.7 billion in 2002, a 29 percent jump in volume from 2001. In contrast, notes saw a 31 percent drop in volume to \$542 million, and certificates of participation volume fell 57 percent to \$45 million.

As the table below shows, the total number of issuances has not rebounded to 1997-1999 levels, where they peaked at 483 in 1998. However, the average par value per issuance in 2002 was roughly \$20.5 million, more than double the \$9.7 million in 1998. This partly reflects a number of large issuances by the state (see page 11).

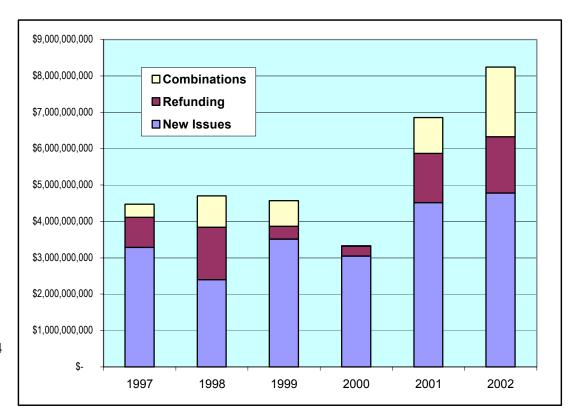

|        | 1997            |     | 1998            |     | 1999            |     | 2000            |     | 2001            |     | 2002            |     |
|--------|-----------------|-----|-----------------|-----|-----------------|-----|-----------------|-----|-----------------|-----|-----------------|-----|

### New and Refunding Issuances, 1997-2002

Combination issuances -- which mix new issues and refundings -- accounted for most of the volume increase for 2002, almost doubling to \$1.9 billion. New issues increased by 6 percent to \$4.8 billion, and refundings increased 15 percent to almost \$1.6 billion.

The categories of refundings and combinations together reached 42 percent of the total 2002 volume, well above the 34 percent in 2001. And whereas the number of new issues dropped slightly, refundings and combinations together jumped 25 percent.

Nevertheless, new issues took an 8-percent larger share of total 2002 volume than they did in 1998, because their volume soared from \$2.4 billion to \$4.8 billion. During that same period, the share of total volume held by refundings dropped 12 percent.

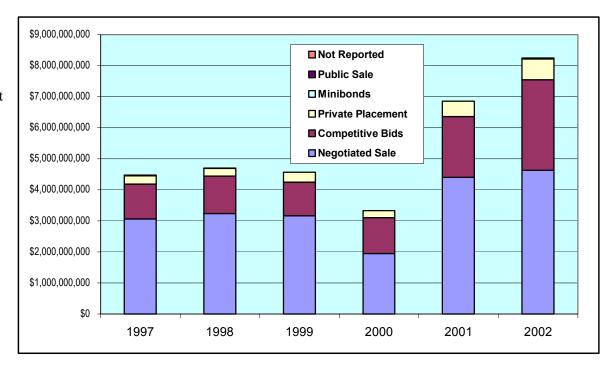

|              | 1997            |     | 1998            |     | 1999            |     | 2000            |     | 2001            |     | 2002            |     |

### Types of Bond Sales, 1997-2002

Negotiated sales continued to be the most popular method of arranging debt placement, accounting for 59 percent of total issuances in 2002. However, over the last six years the number of negotiated sales has varied considerably, reaching 332 in 1998 but within two years dropping by half to 168.

The number of competitive bids and private placements has held fairly steady, respectively averaging 37 and 113 issuances annually, but their average par value has more than doubled since 1998. By comparison, the average par value of negotiated sales rose to \$19.6 million in 2002, almost double what it was in 1998.

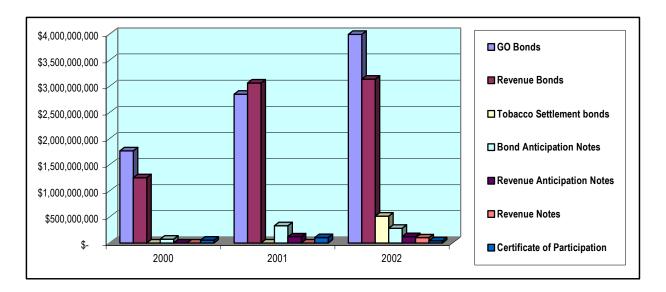

|                  | 1997            |     | 1998            |     | 1999            |     | 2000            |     | 2001            |     | 2002            |     |

# Types of Debt Instruments, 2000-2002

In the last year, general-obligation, or GO bonds, switched places with revenue bonds to become the most popular debt instrument, jumping to 48 percent of all issues. However, the average par value of revenue bonds was slightly higher than GO bonds (\$21.6 million versus \$20.8 million).

The debt instrument that typically receives the third-highest volume, bond anticipation notes, was dwarfed in 2002 by a \$518 million issuance of tobacco settlement bonds.

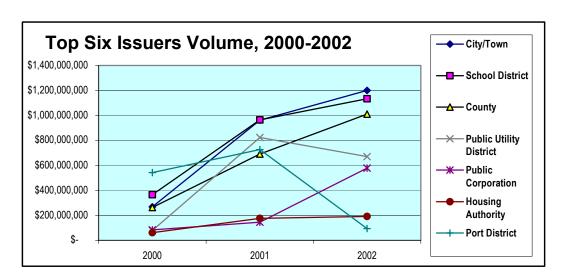

Bond anticipation notes and the category "other notes" both saw declines in the number and dollar volume of issuances. The number of certificate of participation issuances dropped almost 40 percent, and the average par value fell to \$4 million in 2002 from \$5.8 million in 2001.

### Types of Local Issuers, 2000-2002

Local issuer volume reached \$5.2 billion in 2002. This was only 6-percent higher than the previous year but almost three-fold higher than in 2000. Jurisdiction types with the largest volume increases since 2000 included public utility districts (up 839 percent), cities (up 445 percent), school districts (up 309 percent), and counties (up 382 percent). Jurisdiction types with volume decreases included port districts (down 83 percent) and fire districts (down 38 percent).

#### Local Issuers Volume, 2002

### Issue Purpose, 2000-2002

Funding priorities for 2002 changed slightly over the previous two years, but top categories saw substantial growth in volume. The biggest spending increase since 2000 included water/sewer (up ten-fold), streets/roads/bridges (up 575 percent), schools K-12 (up 300 percent), and general government (up 339 percent).

Categories with declining volume since 2000 included higher education (down 70 percent) and ports/marinas (down 51 percent). After a 15-fold jump in 2001, energy/power declined 30 percent.
