The Public Debt Report is published annually by the Bond Users Clearinghouse

Department of Community, Trade & Economic Development
 906 Columbia Street SW, PO Box 42525
 Olympia WA 98504-2525

Web: www.cted.wa.gov/buc

Program Manager: Liz Green-Taylor
 360/725-5021 or buc@cted.wa.gov

Administrative Assistant: Vernita Shye
 360/725-3023 or buc@cted.wa.gov

Statutory Authority: The Revised Code of Washington (RCW) Chapter 39.44.210 reads as follows:

"For each state or local government bond issued, the underwriter of the issue shall supply (CTED) with information on the bond issue within twenty days of its issuance. In cases where the issuer of the bond makes a direct or private sale to a purchaser without benefit of an underwriter, the issuer shall supply the required information. The bond issue information shall be provided on a form prescribed by (CTED) and shall include but is not limited to: (1) The par value of the bond issue; (2) the effective interest rates; (3) a schedule of maturities; (4) the purposes of the bond issue; (5) cost of issuance information; and (6) the type of bonds that are issued. A copy of the bond covenants shall be supplied with this information. For each state or local government bond issued, the issuer's bond counsel promptly shall provide to the underwriter or to (CTED) information on the amount of any fees charged for services rendered with regard to the bond issue."

Important Note:

We make all efforts to ensure the accuracy of the data, but it has not been audited and should be read with caution. CTED assumes no liability for any inaccuracies. We cannot guarantee full compliance with state reporting requirements, so debt issue listings may not be exhaustive. Reported issue costs may not be final figures.

Table terms, A to Z

Debt type. Abbreviations include Com Paper (commercial paper), GO Bonds (general obligation), LID Bonds (local improvement district), Rev Bonds (revenue), TANs or BANs (tax or bond anticipation notes), COPs (certificates of participation), and IBWs (interest-bearing warrants).

Gross underwriting spread. This is the difference between the amount paid to the issuer for the bonds and the amount expected to be yielded when the bonds are resold on the secondary market. The total spread and cost per thousand are listed.

Interest rate. This is the reported net interest rate, and is calculated with the following formula:

$$\frac{\text{Aggregate Interest Payable (+Discount -Premium)}}{\text{Par Value of Issue} \times \text{Average Life}}$$

Issue number. This is the number assigned to an issue as it is input into our database.

Issue series. Multiple issues are designated, and whether bonds are taxable. When multiple issues are reported on one Bond 101 form and have different interest rates, they are listed separately and issue costs are shown under the first issue number. When interest rates are identical, the entire series is listed under one issue number and par values totaled.

Maturity date. For issues that have multiple offerings, the date listed is the one farthest into the future.

New/refund/combo. This designates whether the issue is original, is intended to refinance existing debt, or is a combination of the two.

Par value. This is the amount of the principal or aggregate face value of the issue.

Principal user. In some cases the principal user will not be the issuer. An example of this arrangement is one in which a state agency (the issuer) issues a bond for a local government body (the principal user).

Sale date. This is the date of the bond sale. For a competitive offering it is the date of the bid opening. The date of sale for a negotiated offer or a private placement is the date of the signing of the bond purchase agreement.

Sale type. There are four categories: Neg Sale (negotiated sale), Comp Bids (competitive bids), Private (private placement), and Mini (mini bonds). Competitive bids are open to any underwriter. A negotiated sale is arranged with an individual underwriter. A private placement is a direct sale to one or more investors.

Voter approved? This designates whether the bond issue was approved by a three-fifths vote of the electorate.

NOTES & CAVEATS

Something old, something new...

This year's annual report on public bond and other debt issues continues the tradition established by the Bond Users Clearinghouse three years ago of presenting the data in a clear, graphic format that, we hope, makes it easy to read and understand.

Each year we try to improve the report a bit, and this year we have added a handy list of acronyms and abbreviations (page 24) used in the report, along with what they stand for. We've tried to make the list as comprehensive as possible, but since we have used a lot of acronyms and abbreviations in the interest of saving space, we may have overlooked a few. We apologize for any omissions. If you'll point them out (e-mail works great, to buc@cted.wa.gov), we'll let you know the meaning and will be sure to include them next time.

As in previous years, there are some caveats you should be aware of in reading and interpreting the data. The Bond Users Clearinghouse is not able to enforce compliance with the reporting requirements, and reporting may not be universal. Therefore, trends at times may be more reliable than hard numbers in the report.

In addition, although RCW 39.44 requires reporting within 20 days of debt issuance, some Bond 101 reports trickle in a year or more late, so data from earlier in the year may be more reliable than data from later in the year.

A great deal of effort has been invested in en-

hancing the integrity of the data so that we can make more meaningful year-to-year comparisons, but there is still room for improvement. As a case in point, on page 17 we sort the data by local issuer types. Most categories are well-defined, but "Public corp" and "Municipal corp" may overlap.

In the normal course of business, this report can take a while to reach its audience. If you would like bond information on an ongoing and more immediate basis, you may want to subscribe to our Bimonthly Update, a newsletter with up-to-the-minute data and analysis. Data crunchers might prefer our monthly Excel spreadsheet, which arrives in your e-mail box around the 15th of each month with all the data we collect on every bond issuance reported to the Clearinghouse during the previous month. You can find a subscription form for all of our publications, plus archives of past publications on our website, www.cted.wa.gov/buc.

We welcome your questions and feedback; just drop me a quick e-mail to buc@cted.wa.gov, or give me a call at 360-725-5021.

—Liz Green-Taylor

Note: Issue numbers in this report are coded by date and order in which the Bond 101 report was received. Numbers which begin with "06" were sold in 2005, but the report was received in 2006 by the Clearinghouse.

OVERVIEW

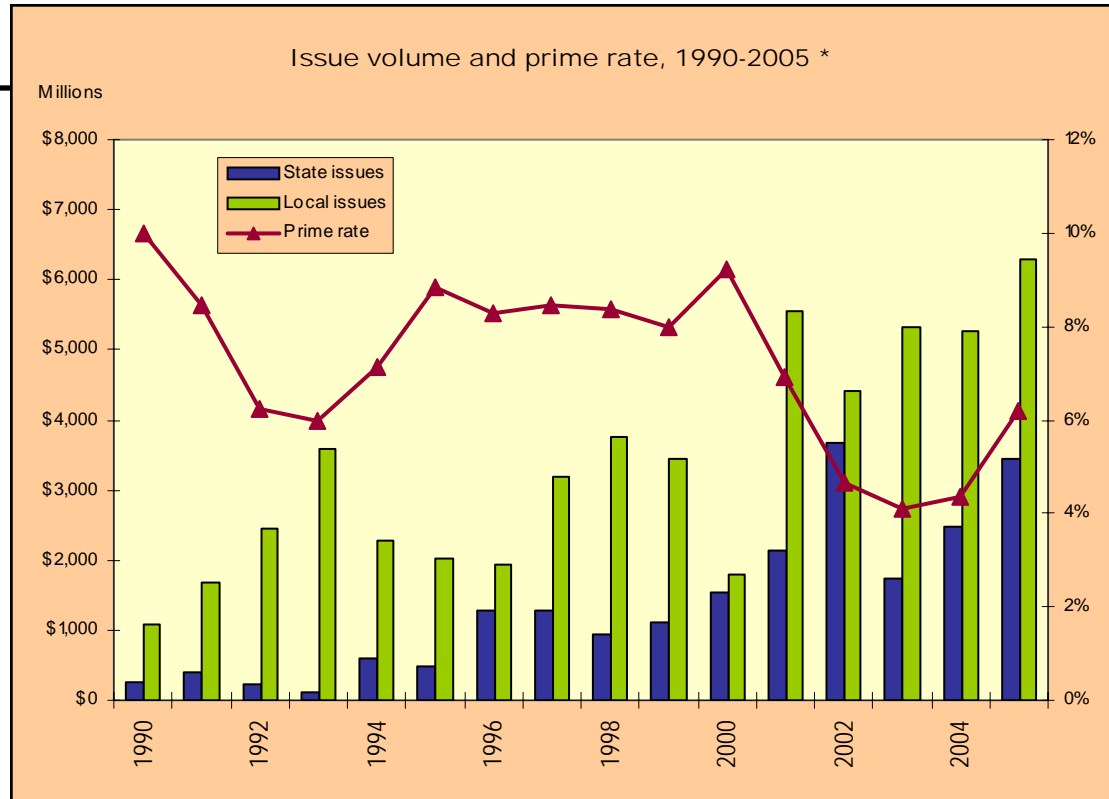

During 2005, total bond volume in the state rose to an all time high. Local volume rose more than 19 percent over 2004 levels, and state volume rose 39 percent over 2004, nearly reaching the 2002 state volume record, which was driven by a large issuance from the Tobacco Settlement Authority.

Refunding issues also reached an all time high volume in 2005, gaining 92 percent over the 2001-2004 average. Refundings went up from 25 percent of total volume in 2004 to 34 percent in 2005 (see page 9).

Among local issuers, school districts posted the greatest increase in bond activity, up 37 percent over 2004. Counties showed the greatest decrease, down 34 percent from 2004's total (see page 17).

Bonds issued for general government purposes dropped from the number one purpose type for the past four years to number four. School districts, always in the top five, took over the number one spot (see page 8).

Cumulative volume, 2001-2005

* This chart uses data sorted by the date when bond information was received by the CTED Bond Users Clearinghouse. As a result, volume totals will be slightly different than those listed in all other tables and charts included in this report, which sort data by the sales date of the bond issue. The prime rate refers to the prime interest rate established by the Federal Reserve.

ISSUE PURPOSE

This is an admittedly inexact classification system (particularly for issues that fund a variety of projects), but it provides a general sense of the funding priorities of debt issuers.

General government, K-12 schools, housing, water/sewer, energy/power, and ports/marinas have consistently been among the top purpose types while other purpose types have varied in debt activity.

TYPES OF DEBT INSTRUMENTS

In 2005, GO and revenue bonds together comprised 88 percent of the total number of bonds issued and 83 percent of the total volume.

The state issued seven GO bonds totaling nearly \$1.9 billion, and 57 revenue bonds totaling \$977 million.

Local jurisdictions had a different pattern, issuing fewer numbers (103) but greater total value (over \$2.6 billion) in revenue bonds, and larger numbers (182) but smaller value (just over \$2.5 billion) in GO bonds.

Overall, the average value of a GO or revenue bond was about \$23 million.

LONG- AND SHORT-TERM DEBT

The proportion of long-term debt (bonds) to short-term debt (notes) has steadily increased over the past five years, from 88 percent long-term debt in 2001 to 96 percent in 2005. However, jurisdiction types varied in their emphasis.

Cities and towns reduced use of short-term debt from a high of 24 percent of total debt issuances in 2002 to less than two percent in 2005. Counties, on the other hand, have steadily used between 10 and 12 percent short-term debt over the past five years.

All local jurisdictions combined issued just less than five percent notes and 95 percent bonds during 2005. State agencies issued 2.4 percent notes and 97.6 percent bonds.

TYPES OF ISSUE SALES

During 2005, negotiated sales increased slightly from 50 percent of the total value of bonds sold to 54 percent. Competitive bids dropped from 45 percent of total value in 2004 to 36 percent in 2005. Private sales jumped from four percent in 2004 to 10 percent in 2005.

Together, negotiated sales and competitive bids comprised 90 percent of the total value, but only 66 percent of the number of issues.

Overall, the sale type was directly related to the size of the issue, with competitive bids averaging \$85.5 million in value, negotiated sales \$24 million, and private sales \$7.4 million.

State agencies continue to emphasize competitive bids over negotiated sales, using competitive bids for 59 percent of sales in 2005. Local jurisdictions, on the other hand, overall have used more negotiated sales, 68 percent of their total volume.

NEW & REFUNDING ISSUES

Refunding issues and combos (combinations of new and refunding issues) continued to increase in both volume and proportion of total issues for 2005, rising from 47 percent of total volume in 2004 to 52 percent in 2005. New issues increased slightly from 2004 levels, but still trailed 2001 and 2002.

New state issues experienced a moderate 15 percent increase over 2004 levels, but were still less than 2002's record high.

New local issue volume and percentage varied according to jurisdiction type: school district new issue volume increased by 32 percent; city/town volume decreased by 67 percent; and county volume decreased by 44 percent. PUD new volume was down 25 percent, but total volume increased for the first time in several years—by a total of 225 percent over 2004.

BOND COUNSELS

Two firms were reported as bond counsel for over 91 percent of issue volume in 2005. However, the charts on this and the next page illustrate how industry rankings varied by jurisdiction type.

Total reported fees for 2005 are listed below, but this data may be less reliable than total volume.

Total reported fees, 2005		
	Fees	% Total
Preston Gates & Ellis	\$5,501,170	64.6%
Foster Pepper & Shefelman	\$2,017,609	23.7%
Orrick, Herrington & Sutcliffe	\$339,863	4.0%
Gottlieb Fisher & Andrews	\$227,880	2.7%
Koegen Edwards LLP	\$149,200	1.8%
Lukins & Annis	\$149,000	1.7%
Nixon Peabody LLP	\$110,000	1.3%
Perkins Coie	\$27,500	0.3%
Total	\$8,522,222	100.0%

* These tables should be viewed with an eye toward general industry patterns rather than the size of charges of individual bond counsels. All bond issues are not reported, and all reported issues do not include data on final bond counsel costs. In addition, these costs may vary based upon factors that may not be apparent from the abbreviated data displayed here.

STATE ISSUERS

In 2005, debt activity by state agencies increased 47 percent over 2004, still falling short of 2002's record high, which was driven in part by a large issue from the Tobacco Settlement Authority.

Several state issuers had significant increases in volume during 2005: over their 2001-2004 average volumes, the Housing Finance Commission increased 284 percent; Washington Economic Development Finance Authority increased 281 percent; and the Washington Higher Education Facilities Authority increased 233 percent.

Average par value for all issues increased 15 percent over 2004.

LOCAL ISSUERS

Compared with significant fluctuations in state bond activity, local jurisdiction bond activity has remained relatively stable over the past five years. However, 2005 volume did increase 22 percent over the 2001-2004 average volume.

A significant change from previous years was the jump in issuances for Energy Northwest, a joint operating agency, which issued over \$658 million in bonds during 2005, more than 10 percent of the local jurisdiction total for the year.

5 WAYS TO LEARN MORE ABOUT PUBLIC DEBT IN WASHINGTON STATE

■ **PUBLIC DEBT BIMONTHLY UPDATE**

This newsletter provides information on bonds and other types of debt issued by local and state government. Print and electronic editions are available bimonthly. Each quarter an expanded newsletter with data analysis is published. Back issues are posted on our website, www.cted.wa.gov/buc.

■ **SPREADSHEET OF DEBT ISSUE DATA**

Available as an Excel 2003 file and distributed as an e-mail attachment each month. Also posted on our website.

■ **ARCHIVES OF DEBT ISSUE INFORMATION**

To receive a copy of an official statement or a "Bond 101" disclosure report form, please fill out a "Bond Issue Info Request Form" on our website.

■ **THE PUBLIC DEBT REPORT: AN ANALYSIS OF BOND AND OTHER DEBT ISSUES BY LOCAL AND STATE GOVT.**

Our annual wrap-up of debt-issue activity by local and state government is offered annually in electronic and print editions.

■ **THE LOCAL GO REPORT: AN ANALYSIS OF OUTSTANDING GENERAL-OBLIGATION MUNICIPAL DEBT**

The results of our annual survey of local government debt capacity are offered annually in electronic and print editions.

ALL OF THESE SERVICES ARE FREE. TO GET ON A DISTRIBUTION LIST, FILL OUT THE SUBSCRIPTION FORM ON OUR WEBSITE.
