

## Clean Buildings

November 18, 2019 Rulemaking Workshop Follow-up

Building Types, Bench-marking, and Standard 100 — Sections 5 & 7

10 a.m. – 2 p.m. – Monday, Nov. 18

### Questions for Consideration

#### Building Types

Please provide comment on the ASHRAE and Energy Star building types, and the binning of different buildings.

#### Change of Use

Please provide comment on whether Commerce should establish a rule for change-of-use in building type, and how that might work.

#### Occupancy

Please provide comment on whether Commerce should establish a rule for adjustments in a buildings occupancy, and how that might work.

#### Special Energy Uses and Considerations

During the meeting, a number of atypical situations were suggested (i.e. restaurants that primarily serve hot vs. cold meals; labs with dry vs. wet beds; forklifts and forklift propane). What are some additional atypical situations Commerce should consider?

Should Commerce adopt a rule for atypical buildings with patio or sidewalk heating space and parking areas, and what should that look like?

Should vehicle-charging stations be exempt?

#### Definitions

Please provide public comment on whether Commerce should include other definitions of financial hardship.
