DEPARTMENT OF COMMERCE

1011 Plum Street SE • PO Box 42525 • Olympia, Washington 98504-2525 • (360) 725-4000

www.commerce.wa.gov

To Washington state legislators,

Under RCW 43.63A.510 (2018), the Department of Commerce (Commerce) must work with six designated agencies to identify, catalog and recommend best uses for underused state-owned land that could be converted into affordable housing for low-income residents. The work for this report was completed in fall 2018, and the results are attached for your review.

The statute required a quick turnaround, limiting Commerce's ability to provide a comprehensive analysis. Staff had 30 days between the data submission deadline and the report's due date. Therefore, Commerce wasn't able to conduct thorough property evaluations that would have yielded more determinate affordable housing opportunities.

To achieve this goal, Commerce recommends the Legislature set up a yearly June 1 deadline for reporting agencies to submit their surplus inventory information. This would give Commerce six months to analyze the data and prepare a report for publishing.

Commerce would use additional criteria to establish a comprehensive framework to identify properties suitable for affordable housing. The framework would align with the affordable housing industry-accepted standards, which are derived in part from the Washington State Combined Funders Affordable Housing Application and the U.S. Department of Housing and Urban Development (HUD) Site and Neighborhood Standards. Criteria would include environment, access to critical services and transportation, all factors needed to provide affordable housing opportunities.

Respectfully,

Lisa Brown, director
Department of Commerce

Executive Summary

Introduction

In many Washington communities, the rising cost of land and construction negatively impacts the ability of affordable housing providers to develop housing for people with low incomes. This is especially true in high-cost areas like the Puget Sound region.

Since 1993, Department of Commerce has worked with designated state agencies to provide an annual inventory of real property that is owned and available for lease. The purpose of this inventory is to encourage effective use of surplus property for the development of affordable housing.

Background

Before passage of Chapter 217, Laws of 2018 (3SHB2382), authorizing statute RCW 43.63A.510 directed five agencies to provide Commerce an inventory of vacant surplus properties. That inventory needed to include both land and buildings and was due to Commerce by Nov. 1 each year. The agencies were also directed to provide a copy of the inventory to parties interested in developing the sites for affordable housing. No report or analysis of property suitability for affordable housing was required.

Section 1 of 3SHB2382 amended RCW 43.63A.510 and 1993 c 461 s 2, effective June 7, 2018. It revised the list of agencies required to report their vacant properties to Commerce. State agencies now designated to report surplus properties to Commerce by Nov. 1 each year are:

- Department of Natural Resources
- Department of Social and Health Services
- Department of Corrections
- Department of Enterprise Services
- Washington State Patrol
- State Parks and Recreation Commission

Four of the original five designated agencies were retained, including the Departments of Natural Resources, Social and Health Services, Corrections, and Enterprise Services. Two new agencies were added, including the Washington State Patrol and the State Parks and Recreation Commission. The Department of Transportation is no longer required to report vacant properties.

The following language is excerpted from Section 1 of 3SHB2382 and names additional requirements.

- (1) The department must work with the designated agencies to identify, catalog, and recommend best use of under-utilized, state-owned land and property suitable for the

development of affordable housing for very low-income, low-income or moderate-income households.

The designated agencies must provide an inventory of real property that is owned or administered by each agency and is vacant or available for lease or sale. The department must work with the designated agencies to include in the inventories a consolidated list of any property transactions executed by the agencies under the authority of Section 3 of this act (3SHB2382), including the property appraisal, the terms and conditions of sale, lease, or transfer, the value of the public benefit, and the impact of transaction to the agency. The inventories with revisions must be provided to the department by November 1st of each year.

- (2) The department must consolidate inventories into two groups: Properties suitable for consideration in affordable housing development; and Properties not suitable for consideration in affordable housing development.

In making this determination, the department must use industry accepted standards such as: location, approximate lot size, current land use designation, and current zoning classification of the property.

The department shall provide a recommendation, based on this grouping, to the office of financial management and appropriate policy and fiscal committees of the legislature by December 1st of each year.

- (3) Upon written request, the department shall provide a copy of the inventory of state-owned and publicly owned lands and buildings to parties interested in developing the sites for affordable housing.

Summary of Findings

Of the six designated agencies required to report their inventories, three reported no surplus properties and three reported they had a total of 38 surplus properties that are vacant or available for sale or lease.

The designated agencies did not dispose of any public properties for public benefit under the authority of Section 3 of 3SHB2382.

Of the 38 surplus properties inventoried, Commerce determined that 28 are suitable for further consideration for affordable housing development and 10 are not.

The statute requires designated state agencies to report by Nov. 1 and Commerce to submit its analysis to the Legislature by Dec. 1. Therefore, this preliminary determination of suitability for development is based on a swift analysis of state agency reports in which properties that were obviously unsuitable for affordable housing development were eliminated.

State Surplus Property Inventory

Key Findings and Inventory

Of the six designated agencies required to report their inventories, three reported no surplus properties and three reported they had a total of 38 surplus properties that are vacant or available for sale or lease.

The designated agencies did not dispose of any public properties for public benefit under the authority of Section 3 of 3SHB2382.

Determination of Suitability for Affordable Housing

As required by 3SHB2382 Sec. 1 (2), Commerce must consolidate inventories and determine which properties are suitable for consideration in developing affordable housing. The determination must include the industry-accepted standards of location, approximate lot size, current land use designation and current zoning classification.

In developing the suitability criteria, Commerce aligned the four industry-accepted standards with the goals and standards used in the Washington State Growth Management Act (GMA)¹ and Washington State Affordable Housing Combined Funders Application.²

The GMA (Chapter 36.70 RCW, 1990, and WAC 365-196) requires cities and counties develop comprehensive plans containing specific information and analysis. The goal is to focus urban growth and protect rural and resource lands from sprawl. All development in counties and cities that plan under the GMA must adhere to the city and county comprehensive plans.

A number of entities adhere to the Washington State Affordable Housing Combined Funders standards, including:

- Washington State Housing Trust Fund
- City of Seattle Office of Housing
- King County and Snohomish County local and HUD-funded affordable housing programs
- A Regional Coalition for Housing (ARCH)
- Washington State Housing Finance Commission for Low-Income Housing Tax Credits

Factors from the Combined Funders Application set best practices governing the development of publicly funded affordable housing development sites in Washington state.

¹ [Washington State Growth Management Act \(GMA\)](#)

² [Combined Funders Affordable Housing Application](#)

The following chart details Commerce’s criteria in determining the property’s suitability.

Table 1: Affordable Housing Suitability Criteria

Industry-Accepted Standards	Criteria for Properties Suitable for Consideration in Affordable Housing Development	Criteria for Properties NOT Suitable for Consideration in Affordable Housing Development
Location	<ul style="list-style-type: none"> • No impediments to development, such as steep slopes and the presence of significant critical areas • Located near population centers and services, preferably inside the urban growth area • Infrastructure (streets and utilities) in place • Property must be legally accessible 	<ul style="list-style-type: none"> • Impediments to development, such as steep slopes, wetlands or flooding • Remote location (too far from population centers, services and transit) • No infrastructure (streets and utilities) in place • No legal or feasible ingress/egress
Approximate Lot Size	Dimensions of lot allow development under existing zoning	Not developable per codes, or some parcels appear to be too small to develop
Current Land-Use Designation	Should be residential, ideally within urban growth area; parcels in rural areas outside urban growth areas can be zoned at a density that would not allow for affordable housing unless in a “limited area of more intensive rural development” (LAMIRD)	Lands with natural resource designation (forest, agricultural, mineral) because they are generally very large parcels that are remote from urban services. Parcels that do not have a residential designation would be excluded, as changing the zoning would slow the development process beyond the 36 month goal detailed in 3SHB2382 Section 1.
Current Zoning Classification	Current zoning permits all types of affordable housing; allows higher-density development	Zoning that is low density or overly restrictive may be difficult to use for affordable housing

Although there are exceptions, it is unlikely that lands with a natural resource lands designation, such as forest, agricultural or mineral, will be suitable for affordable housing for several reasons:

1. The Washington State Growth Management Act goal for natural resource industries in RCW 36.70A.020 (8) encourages “the conservation of productive forestlands and productive agricultural lands, and discourages incompatible uses.”
2. Resource lands are generally large parcels, designed to conserve land, and not promote development.
3. Parcels are often remote from essential public services, such as sewer, water and transportation services, requiring the development of well and septic systems, and transportation alternatives.

Summary of Recommendations

Based on the criteria, Commerce has reviewed each property's suitability for affordable housing development, as required by Section 1 of 3SHB2382. The first column in the chart on the previous page describes criteria that suggests a property might be suitable for consideration.

Properties that fit these standards might upon further investigation not be suitable. turn out to be unsuitable. The second column describes criteria that tend to exclude a property from being suitable. Properties to which these criteria apply likely are not suitable for affordable housing development, absent significant extenuating circumstances.

Of the 38 surplus properties inventoried, Commerce determined that 28 are suitable for further consideration for affordable housing development and 10 are not.

Tables 2 and 3 below consist of each agency's inventory, separated into two categories: properties suitable and not suitable for consideration in affordable housing.

Lrg SA	Unknown designation	Douglas

Conclusion

Housing supply and affordability issues affect every community in Washington. Between 2006 and 2016, rents have increased 18 percent and the median income for the population as a whole has increased only 3 percent, according to the U.S. Census Bureau American Community Survey One-Year Estimates.

Affordable housing developers face strong competition for developable land, especially in the Puget Sound region. Identifying and evaluating state surplus properties can be an additional tool to support efforts that result in the increase of affordable housing stock in the state of Washington.

Appendix A: Definitions from 3SHB2382

- “Affordable housing” means residential housing that is rented or owned by a person who qualifies as a very low-income, low-income, or moderate-income household or who is from a special needs population, and whose monthly housing costs, including utilities other than telephone, do not exceed 30 percent of the household’s monthly income.
- “Very low-income household” means a single person, family, or unrelated persons living together whose income is at or below 50 percent of the median income, adjusted for household size, for the county where the affordable housing is located.
- “Low-income household” means a single person, family, or unrelated persons living together whose income is more than 50 percent but is at or below 80 percent of the median income where the affordable housing is located.
- “Moderate-income household” means a single person, family, or unrelated persons living together whose income is more than 80 percent but is at or below 115 percent of the median income where the affordable housing is located.
- “Affordable housing development” means state-owned real property appropriate for sale, transfer, or lease to an affordable housing developer capable of:
 - Receiving the property within 180 days; and
 - Creating affordable housing units for occupancy within 36 months from the time of transfer.
- “Public benefit” means affordable housing for low-income and very low-income households as defined in RCW 43.63A.510, and related facilities that support the goals of affordable housing development in providing economic and social stability for low-income persons.
- “Surplus public property” means excess real property that is not required for the needs of or the discharge of the responsibilities of the state agency, municipality, or political subdivision.
