

Clean Buildings

October 29, 2020 Incentive Program Workshop Follow-up

Program development kick-off meeting

10 a.m. – 11:30 a.m. – Thursday Oct. 29

Questions for Consideration and Input Opportunities

Incentive Program Elements

Please provide input on what elements should be included in the incentive program guidelines:

- The incentive program is for early adoption of the Clean Buildings standard that was developed through law and rulemaking. What elements of the incentive program do we need to explore and discuss in future workshops and/or comment periods (that otherwise aren't included in statute)?
 - Please reference the sections in the table of contents.

Equity and Inclusion

Please provide high-level input on the following:

- Commerce discussed the importance of creating an equitable and inclusive Early Adopter Incentive Program. The intent is to expand access to participation and opportunities to a broad range of building owners and geographies in the State.
 - What should be considered for discussion and development in subsequent workshops and community engagement?
 - What can Commerce do (actions we can take) to expand access and participation opportunities in the incentive program development workshops?
