Executive summary

Overview
In nearly every Washington community, the rising cost of land and construction negatively affects the ability of affordable housing providers to develop housing for people with low incomes.¹ This is especially true in high-cost areas like the Puget Sound region but growing across the state as housing prices increase. The use of state-owned real property provides a low-cost or no-cost option if the land is used for public benefit, such as for affordable housing for people with low incomes.

Since 1993, the Department of Commerce (Commerce) has worked with other state agencies to provide an annual inventory of real property that is state-owned and available for sale, transfer or lease. Since 2018,² the designated agencies include the Washington State Patrol (WSP), the State Parks and Recreation Commission (PARKS), and the Departments of Natural Resources (DNR), Social and Health Services (DSHS), Corrections (DOC), and Enterprise Services (DES).

RCW 43.63A.510 requires Commerce to consolidate surplus property inventories into two groups: Properties suitable for consideration in affordable housing development, and properties that are not suitable for consideration. Of the properties inventoried for 2021, nine were determined suitable for further consideration for affordable housing development (Table 1).

In addition to categorizing the properties, this report provides additional detail about the state-owned surplus property. This includes distances to nearby transit stops, child care centers, schools and grocery stores, among other such points of consideration. These points were suggested by the Washington State Affordable Housing Combined Funders applications, the Housing Trust Fund Handbook and Evergreen Sustainability Development Standards.

The State Surplus Property Program annual report provides access to the inventory of state-owned properties that are vacant or available for sale or lease for affordable housing for local decision makers, state

¹ Washington State Department of Commerce, Affordable Housing Advisory Board, 2019 Annual Report
² SHB 2382
officials and legislators, the public, and other interested parties. The program's goal is to promote the use of state-owned surplus properties for public benefit, specifically to increase the supply of quality, safe and affordable housing units.

RCW 43.63A.510 requires designated state agencies to report annually by November 1 and Commerce to submit its analysis to the Office of Financial Management and appropriate policy and fiscal committees of the legislature by December 1. Therefore, this preliminary determination of suitability for development is based on a swift analysis of state agency reports, in which properties that were clearly unsuitable for affordable housing development consideration were eliminated.

Surplus Property Inventory annual update

In total, the six designated agencies reported 33 surplus properties that are available for sale, transfer, or lease. PARKS reported 23 and DNR reported 10. Four reported no surplus properties. None of the designated agencies disposed of any public properties for affordable housing, under the authority of RCW 39.33.015, during the one-year period from Nov. 1, 2020, to Nov. 1, 2021. The State Surplus Property Program also requested the Surplus Property Inventory of the Real Estate Services Program of the Washington State Department of Transportation (WSDOT), which reported a further 14 properties. The total number of properties subject to suitability determination in this report is 47.

Of these 47 properties, the State Surplus Property Program determined that nine are suitable for consideration for affordable housing development and 38 are not suitable. PARKS and DNR reported no changes to their inventory from the prior year. WSDOT’s surplus properties account for all of the increase in new state-owned parcels on the State Surplus Property Program’s 2021 inventory list.

The increase in the number of surplus properties from PARKS is due to separating all properties that were previously reported together for individual parcel evaluation. These include the PARKS properties at Nolte State Park near Naco, the Bottle Beach properties south of Ocosta, the Crystal Falls State Park properties east of Colville, and the four lots between Government Way and Houston Road west of Spokane. The WSDOT properties at Patton Boulevard and Harris Road in Moses Lake were also separated to include individual parcel evaluations.

Conclusion

The State Surplus Property Program inventory list consolidated 47 properties in 2021:

- Nine properties (19%) on the Surplus Property Inventory are suitable for consideration of affordable housing development.
- Thirty-eight properties (81%) on the Surplus Property Inventory are not suitable for consideration of affordable housing development.
- No properties from the 2020 State Surplus Property Program Report were transferred, leased, or disposed by designated agencies for affordable housing development under the authority of RCW 39.33.015.
Program history and authorizing legislation

The potential to use available state properties for capital investments has gained attention among lawmakers in recent years. In 2018, the Washington State Legislature directed Commerce to produce a report on state-owned surplus properties that could be developed into affordable housing and increased the number of reporting agencies from five to six. More detail on the history of this program is in the 2018 State Surplus Property Program Report.

RCW 43.63A.510 established statutory requirements for the State Surplus Property Program, creating the framework for the property suitability criteria the program uses.

RCW 43.63A.510 - Affordable housing — Inventory of state-owned land

(1) The department must work with the designated agencies to identify, catalog, and recommend best use of underutilized, state-owned land and property suitable for the development of affordable housing for very low-income, low-income or moderate-income households. The designated agencies must provide an inventory of real property that is owned or administered by each agency and is vacant or available for lease or sale. The department must work with the designated agencies to include in the inventories a consolidated list of any property transactions executed by the agencies under the authority of RCW 39.33.015, including the property appraisal, the terms and conditions of sale, lease, or transfer, the value of the public benefit, and the impact of transaction to the agency. The inventories with revisions must be provided to the department by November 1st of each year.

(2) The department must consolidate inventories into two groups: Properties suitable for consideration in affordable housing development; and properties not suitable for consideration in affordable housing development. In making this determination, the department must use industry accepted standards such as: Location, approximate lot size, current land use designation, and current zoning classification of the property. The department shall provide a recommendation, based on this grouping, to the office of financial management and appropriate policy and fiscal committees of the legislature by December 1st of each year.

(3) Upon written request, the department shall provide a copy of the inventory of state-owned and publicly owned lands and buildings to parties interested in developing the sites for affordable housing.

(4) As used in this section:

(a) "Affordable housing" means residential housing that is rented or owned by a person who qualifies as a very low-income, low-income, or moderate-income household or who is from a special needs population, and whose monthly housing costs, including utilities other than telephone, do not exceed thirty percent of the household's monthly income.

(b) "Very low-income household" means a single person, family, or unrelated persons living together whose income is at or below fifty percent of the median income, adjusted for household size, for the county where the affordable housing is located.

(c) "Low-income household" means a single person, family, or unrelated persons living together whose income is more than fifty percent but is at or below eighty percent of the median income where the affordable housing is located.

(d) "Moderate-income household" means a single person, family, or unrelated persons living together whose income is more than eighty percent but is at or below one hundred fifteen percent of the median income where the affordable housing is located.

3 SHB 2382 (2018)
(e) "Affordable housing development" means state-owned real property appropriate for sale, transfer, or lease to an affordable housing developer capable of:

(i) Receiving the property within one hundred eighty days; and

(ii) Creating affordable housing units for occupancy within thirty-six months from the time of transfer.

(f) "Designated agencies" means the Washington state patrol, the state parks and recreation commission, and the departments of natural resources, social and health services, corrections, and enterprise services.
State Surplus Program improvements

In 2021, the State Surplus Program worked to improve stakeholder outreach and increased the types of information available in the annual report. The results of these strategies are evidenced by the new online map discussed below, in addition to the content found in this report.

New mapping tool shows inventory

During the report interim, improving the visibility of the program inventory was identified as a means to engage more directly with stakeholders. Additionally, mapping an up-to-date inventory list of available parcels is considered best practice for state surplus real property programs because it helps inform the public and non-profit housing organizations.

With these goals in mind, a mapping tool was created to show where in Washington each surplus parcel is located, which agency owns the parcel, and includes property datasheets detailing the criteria of the property’s suitability based on requirements of RCW 43.63A.510. Each property displayed also includes contact information for the state agency representative who manages that agency’s surplus property.

Leveraging state and federal agency data sources

With this report, the State Surplus Program expanded the use of publically- and privately-available data sources that are beneficial for determining the suitability of the state-owned surplus properties (Table 2). These sources are used in the online map and in the property datasheets found in Appendix D.

**Creation of a spatial database**

A spatial database that includes information on critical areas, such as wetlands, geological and erosion hazards using county geographic information services programs was created as a unified source of location information. However, many Washington counties do not have this information available online. Local government comprehensive plans and critical areas maps were used to check these location details when county data was not available.

As state surplus properties are added to the inventory, the database will streamline the process of analyzing properties for potential affordable housing suitability based on the embedded criteria. The database also includes key interest points to affordable housing developers, such as distances to nearby transit lines, child care centers, schools, and grocery stores, among other such points of consideration in the Washington State Affordable Housing Combined Funders Standards and Evergreen Sustainability Development Standards. Additionally, the database contains pertinent U.S. Census data from the American Community Survey that details homeowner and rental demographics, income, and socioeconomic characteristics. These details will be integrated into future iterations of the State Surplus Annual Report to build neighborhood-level profiles in areas with suitable state surplus property sites.
Determination of affordable housing suitability

Affordable housing suitability criteria

In developing the suitability criteria, Commerce aligned the four industry-accepted standards in Table 4 with the goals and standards used in the Washington State Growth Management Act (GMA)\(^6\) and Washington State Affordable Housing Combined Funders application.\(^7\) A number of affordable housing development entities adhere to the Washington State Affordable Housing Combined Funders standards, including:

- Washington State Housing Trust Fund
- City of Seattle Office of Housing
- King County and Snohomish County local and Department of Housing and Urban Development-funded affordable housing programs
- A Regional Coalition for Housing (ARCH)
- Washington State Housing Finance Commission for Low-Income Housing Tax Credits

Table 3 details Commerce’s criteria in determining the property’s suitability for affordable housing development. The first column describes criteria that suggest a property might be suitable for consideration. The second column describes criteria that tend to exclude a property from being suitable, absent significant extenuating circumstances.

Table 3: Affordable housing suitability criteria

<table>
<thead>
<tr>

</thead>
</table>
| Location                    | • No impediments to development, such as steep slopes and the presence of significant critical areas  
                              • Located near population centers and services, preferably inside the urban growth area  
                              • Infrastructure (streets and utilities) in place  
                              • Property must be legally accessible | • Impediments to development, such as steep slopes, wetlands or flooding  
                             • Remote location (too far from population centers, services and transit)  
                             • No infrastructure (streets and utilities) in place  
                             • No legal or feasible ingress/egress |
| Approximate lot size        | • Dimensions of lot allow development under existing zoning | • Not developable per codes, or some parcels appear to be too small to develop |

---

\(^6\) The Growth Management Act. The GMA (Chapter 36.70 RCW, 1990, and WAC 365-196) requires cities and counties develop comprehensive plans containing specific information and analysis. The goal is to focus urban growth and protect rural and resource lands from sprawl. All development in counties and cities that plan under the GMA must adhere to the city and county comprehensive plans.

\(^7\) Washington State Affordable Housing Combined Funders Application
<table>
<thead>
<tr>
<th>Industry-accepted standards</th>
<th>Criteria for properties suitable for consideration in affordable housing development</th>
<th>Criteria for properties not suitable for consideration in affordable housing development</th>
</tr>
</thead>
</table>
| **Current land-use designation** | • Should be residential, ideally within urban growth area  
• Parcels in rural areas outside urban growth areas can be zoned at a density that would not allow for affordable housing unless in a “limited area of more intensive rural development” (LAMIRD) | • Natural Resource designation (forest, agricultural, mineral) because they are generally very large parcels that are remote from urban services.  
• Parcels that do not have a residential designation would be excluded, as changing the zoning would slow the development process beyond the 36-month goal detailed in 3SHB2382 Section 1. |
| **Current zoning classification** | • Current zoning permits all types of affordable housing  
• Allows higher-density development | • Zoning that is low density or overly restrictive may be difficult to use for affordable housing |
State Surplus Property results

Properties suitable for consideration in affordable housing development

Of the 47 surplus properties consolidated in the State Surplus Program’s 2021 inventory, nine are suitable for further consideration for affordable housing development and 38 are unsuitable. Table 4 lists the suitable properties and provides the street or nearest intersection of the property, which hyperlinks to the county assessor’s map for each property, when available. The table also includes relevant parcel data, the land-use designation of the parcel, city or county zoning code information of the parcel, and the page number where more detailed parcel information can be found in Appendix D.

The results of this report are not conclusive, but rather reflect data provided by participating state agencies and accessible digitally. Site-specific visits and consultation with the jurisdiction’s planning department would be required to reconcile conflicting data, gather missing data, and verify the suitability of these properties for affordable housing development.

Supplemental State Surplus Property information and results

Appendix A provides a review of the definitions contained in RCW 43.63A.510 (Affordable Housing — Inventory of State-owned Land), and RCW 39.33.015 (Transfer, Lease, Disposal of Public Property for Affordable Housing.) Appendix B includes the list of surplus properties that are unsuitable for consideration in affordable housing development in Table 1.

Appendix C describes the methodology for the expanded data collected for suitable properties in the State Surplus Property Inventory. Appendix D has detailed information on the nine properties that were determined to be potentially suitable for affordable housing development.

Conclusion

State Surplus Property Program Inventory findings
The State Surplus Property Program inventory list consolidated 47 properties in 2021:

- Nine properties (19%) on the Surplus Property Inventory are suitable for consideration of affordable housing development.
  - Seven of these suitable properties are located in Western Washington and two are located in Eastern Washington.

- Thirty-eight properties (81%) on the Surplus Property Inventory are unsuitable for consideration of affordable housing development. Unsuitable properties typically have more than one disqualifying feature, with the primary reason being a lack of infrastructure:
  - Twenty-seven properties (71%) lack access to at least two types of utilities (power, water and sewer)
  - Twenty-five properties (66%) have zoning restrictions
  - Nineteen properties (50%) do not have a legal access
  - Thirteen properties (34%) have a lot is too small for residential development based on local code
  - Ten properties (26%) with wetlands present
  - Ten properties (26%) with geologic hazards present
  - Seven properties (18%) with erosion impediments present

- No properties from the 2020 State Surplus Property Program Report were transferred, leased, or disposed for affordable housing development under the authority of RCW 39.33.015.
An ongoing need to support affordable housing in Washington

In Washington, nearly half of renters are cost-burdened, spending more than 30% of their household income on housing costs.\(^8\) Those with extremely low incomes, where household income is 30% or less of the Area Median Income, have the hardest time finding and keeping housing.\(^9\) As shown in Figure 1, these households must spend more of their income on housing than what is affordable to their income level. This puts these households at risk of losing their housing or moving to less expensive areas, which are further from jobs and public transportation options.\(^10\) When housing costs are more affordable and housing opportunities are more readily available, there is a lower likelihood of these households becoming homeless or being priced out of the places they currently live. As of 2019, 21.7% of Washington renters (229,295 households) were extremely low-income. For the affordable housing gap to close, an additional 157,461 units would be necessary to house these low-income earners.\(^11\)

Housing affordability is also not improving for Washington’s prospective homeowners. The Washington Center for Real Estate Research’s (WCRER) Housing Market Summary indicates that for first-time and repeat homebuyers, home purchases continue to be unaffordable in 20 of the state’s 39 counties.\(^12\) WCRER’s Home Affordability Index (HAI) is a measure of median income and the amount needed to afford a median-priced home. An HAI value of 100 means that a household with a median income has exactly enough income to qualify for a mortgage on a median priced home.\(^13\) Similarly, the first time HAI uses a median household income of perspective buyers that is lower than the HAI, to approximate the affordability of first-time buyers purchasing a

---

\(^9\) Department of Commerce, Affordable Housing Advisory Board Annual Update (2019)

less-than-median priced home. A first time HAI value of 100 means that a household with 70% of median household income has exactly enough income to qualify for a mortgage on a home priced at 85% of the median.\(^\text{14}\) As illustrated in Figure 2, there was a temporary increase in affordability throughout the state in 2020, but the trend in decreasing housing affordability throughout the state in years prior continued in 2021.

Using state-owned surplus properties for affordable housing development

Although no properties on the State Surplus Property Program’s inventory were used for affordable housing development throughout 2020-21, programs within Commerce note a substantial need for this type of construction in Washington.\(^\text{15}\) The State Surplus Property Program plans to continue working to improve the quality of this report and its visibility with interested stakeholders. With the continued support of designated state agencies, the State Surplus Program Report can be an additional tool to support efforts that result in more affordable housing throughout the state.

Appendix A: Definitions from RCW 43.63A.510 and RCW 39.33.015

RCW 43.63A.510 "Affordable Housing--Inventory of State-owned Land"

"Affordable housing" means residential housing that is rented or owned by a person who qualifies as a very low-income, low-income, or moderate-income household or who is from a special needs population, and whose monthly housing costs, including utilities other than telephone, do not exceed 30 percent of the household’s monthly income.

“Very low-income household” means a single person, family, or unrelated persons living together whose income is at or below 50 percent of the median income, adjusted for household size, for the county where the affordable housing is located.

“Low-income household” means a single person, family, or unrelated persons living together whose income is more than 50 percent but is at or below 80 percent of the median income where the affordable housing is located.

“Moderate-income household” means a single person, family, or unrelated persons living together whose income is more than 80 percent but is at or below 115 percent of the median income where the affordable housing is located.

“Affordable housing development” means state-owned real property appropriate for sale, transfer, or lease to an affordable housing developer capable of:

- Receiving the property within 180 days
- Creating affordable housing units for occupancy within 36 months from the time of transfer

"Designated agencies" means the Washington State Patrol, the State Parks and Recreation Commission, and the departments of Natural Resources, Social and Health Services, Corrections, and Enterprise Services.

RCW 39.33.015 “Transfer, Lease, Disposal of Public Property for Affordable Housing"

“Public benefit” means affordable housing for low-income and very low-income households as defined in RCW 43.63A.510, and related facilities that support the goals of affordable housing development in providing economic and social stability for low-income persons.

“Surplus public property” means excess real property that is not required for the needs of or the discharge of the responsibilities of the state agency, municipality, or political subdivision.

Appendix C: Expanded data collected for suitable properties in the State Surplus Property Inventory

The suitability of a property was defined by RCW 43.63A.510 (2) as:

- Lot characteristics, for example lot size
- Current land-use designation
- Current zoning code and ability to develop all forms of affordable housing
- Location characteristics and impediments to construction

In 2019, the State Surplus Property Program decided to include more detailed location information about the properties on the surplus inventory list. After review of Washington State Affordable Housing Combined Funders applications and the Department of Commerce Housing Trust Fund handbook, additional criteria were selected to provide more detailed property data to potential affordable housing developers. Criteria included:

- Analysis of lot size and land use that fits within zoning requirements
- Permitted construction of single-family dwellings, multi-family dwellings and group homes
- Evaluate the presence of tsunami hazards, critical areas and wetlands in the property’s vicinity
- Establish whether properties have access to roads and basic utilities
- Determine there are no geological or environmental impediments to development
- Calculate the distance to basic services, such as schools, medical facilities and grocery stores
- Assess if properties have access to employment centers

The results of this report are not conclusive; they merely reflect data provided by participating state agencies — Washington State Patrol, State Parks and Recreation Commission, Department of Natural Resources, Department of Social Health Services, Department of Corrections, Department of Enterprise Services, the Department of Transportation — and digitally accessible data.

In some cases, discrepancies between information gathered by agencies and county assessors prevented determination of a property’s suitability. In other cases, the requisite data to determine a property’s suitability could not be located.

Site-specific visits would be required to reconcile conflicting data, gather missing data, and verify the suitability of these properties for affordable housing development.
