... households with ages 18-24 members only	34,163	10,135	984	4,412	670
... households with ages 25+ members and without minors	365,454	78,624	5,217	41,688	4,059
... households with both minors and a single adult	100,521	12,529	758	4,600	454
... households with both minors and at least two adults	77,342	4,490	325	1,740	208
... where unknown household type	226	61	23	36	12
TOTAL REPORT POPULATION (HOUSEHOLDS)	578,273	106,246	7,440	52,792	5,521

Run Date 2021-07-09

NOTES:

1. Data was extracted from Provider One (P1), the Integrated Client Database (ICDB), the Automated Client Eligibility System (ACES), and the Homeless Management Information System (HMIS). Disability categorization is based on P1 medical eligibility records for the 24 month period previous to the current experience of homelessness. HUD defines chronic homelessness as an individual with a disabling condition who has been homeless and living or residing in a place not meant for human habitation, a safe haven, or in an emergency shelter continuously for a) at least 1 year or b) on at least four separate occasions in the last 3 years, where the cumulative total of the four occasions is at least one year. Mental health treatment need is identified by the presence of diagnoses, psychotropic medications and/or mental health services. Substance use disorder treatment need is identified by diagnoses, procedures, prescriptions, treatment and/or arrests that reflect a possible substance use disorder. Rows cannot be added because of overlapping clients within each categorization.

Snapshot of Homelessness in Washington State for January 2021

Based on combined Medicaid, economic service, and HMIS populations

Includes recipients and associated household members

Supplementing Statewide Point-In-Time Count (PIT), serving Results Washington Goal 4, Section 3.1.c

2. "Homeless or Unstably Housed" refers to all homeless and all unstably housed, including couch surfing. "Homeless Only" is a subset of "homeless or unstably housed" and refers only to unsheltered clients or those living in emergency shelter. "New" homelessness refers to clients who are homeless in the current month but not in the month previous, while "continuing" refers to all homeless clients. There might be larger numbers for "new homeless only" columns because a transition from "unstably housed or homeless" to "homeless only" is counted as "new" homelessness. Columns cannot be added across rows because the continuing and "Homeless or Unstably Housed" categories include new and "Homeless Only" categories, respectively. Household classification is derived from the HUD categories of "Households without children," "Households with at least one adult and one child," and "Households with only children." HUD classified households do not necessarily correspond to Medicaid or economic service assistance units (AUs). HMIS denotes the statewide Homeless Management Information System used to track emergency shelters and other housing services.

3. In 2020, policies and practices associated with the COVID-19 pandemic reduced the availability of emergency shelter beds, the number of evictions, and the availability of behavioral health services. It is unclear how these policies impacted the homeless counts and behavioral health characteristics reported for that year.

Prepared by DSHS Research and Data Analysis Division for Washington State Department of Commerce.
